
--ABSTRACT OF THE DISCLOSURE

A² An air-conditioned switching cabinet with wall elements and at least one cabinet door and an air-conditioning unit and/or heat exchanger. Use of the air-conditioning is simplified and broadened according to the invention by incorporation of the air-conditioning unit and/or heat exchanger in a wall element or the cabinet door, the wall element or cabinet door being designed as a housing for the components of the air-conditioning unit and/or heat exchanger.--.
